

CYCLONE DURADRAIN™ TRAILER WATER SEPARATOR

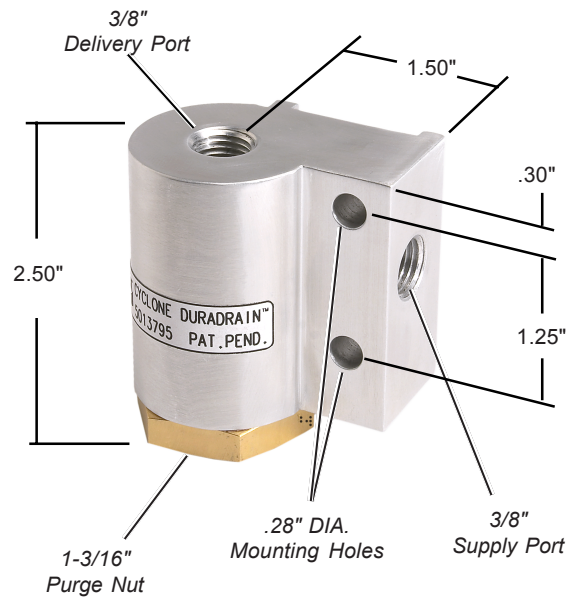

OE & SERVICE PIECE
NUMBERS

CATALOG
08-A-37

DESCRIPTION

The Bendix® Cyclone DuraDrain™ trailer water separator can be installed in the trailer control and/or in the supply line near the gladhand. As air enters the Cyclone DuraDrain™ separator a cyclonic action separates out water and particulates, removing more than 95% of the water that passes through it. The removal of water and contaminants reduces brake drag and improves the life of the trailer system components.

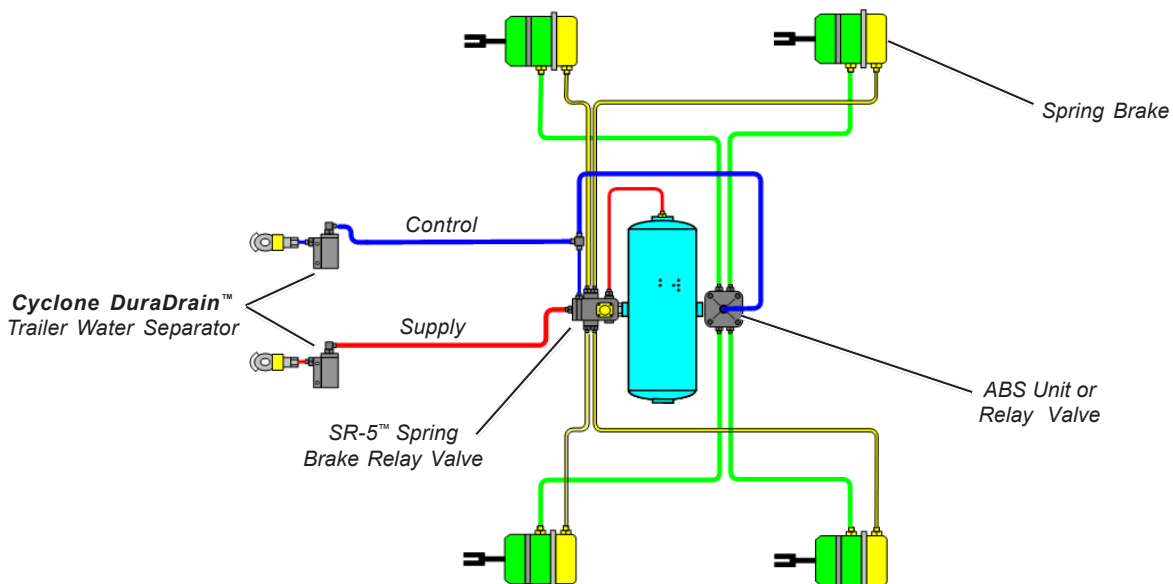

Weight 0.6 lbs.
Device Code 2402
For service information see SD-08-2402.

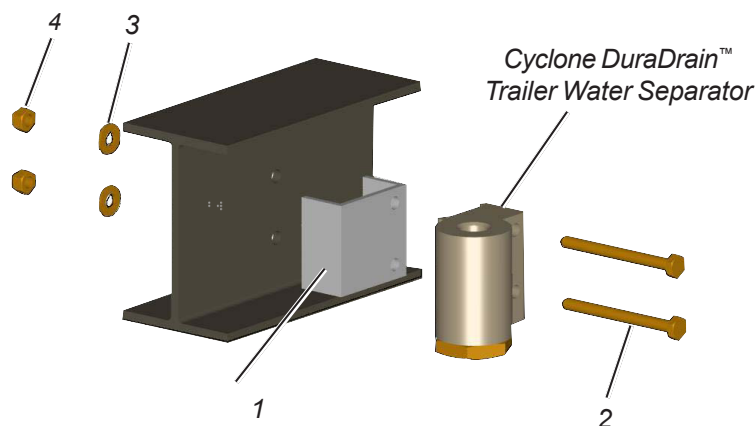

See Catalog Page 08-A-38 for Maintenance Kits
